

**DISCSMARK STAKE MARKER , A STAKE MARKER ,WITH A NAIL-ABLE HEAD INSERT,
TO LOCATE POINTS ON THE GROUND**

Abstract: a stake marker, with a nail-able head insert (4) for the purpose of permanently attaching other marker items (provided by user) and a tube body (2), for locating points on the ground. The tube (2) can be steel, galvanized steel, or stainless steel approximately $\frac{1}{2}$ inch in diameter and varies in length to approximately 2 feet. The nail-able head insert (4) can be waterproofed wood, plastic or metal.

Crimping (3) the tube (2) onto the wood insert (4) secures the insert to the tubing. Various means of securing the insert to the tube such as adhesive (5) and by using a pin (6). A metal or plastic insert (7), that lips the top edge of the tube, the insert having a pilot hole (9) for receiving a nail or screw, and having an expanding body, as the nail or screw is inserted, to expand the insert body against the tube. The head of the tube and insert is coated with paint or vinyl (1) for visibility and durability.

An identifying marker item, provided by the user, can be permanently attached to the head of the stake marker with a nail or non removable screw.
